

**DENTSPLY FRIADENT WORKSHOP**

From December 2nd to 4th, the Swiss, Austrian, and German Association for Implantology will hold their joint symposium in Berne (Switzerland). As our contribution to the Gold sponsor workshops, DENTSPLY Friadent will present concepts for your success in implant dentistry. The midmorning of December 2nd is dedicated to the motto “Fast – Beautiful – Successful”: Renowned implantologists share their experience in faster treatment alternatives and first-class esthetic results with the latest generation of ceramic abutments:

The program includes the following lectures:

**Dr. Peter Gehrke:** Perfection by innovation: New horizons in material science and design know-how for the hard and soft tissue integration.

**Dr. Dr. Dieter Haessler:** Faster treatment and biocompatibility: Synergy of an up-to-date treatment concept.

**Dr. Frank Kornmann:** High-performance in implantology: Galvano-prosthetics and CAD-CAM.

**Dr. Alessandro Ponte:** Esthetic success is based on trend-setting technology.

**Dr. Dietmar Weng:** Bone resorption, bone remodelling, and bone stability: What happens with the peri-implant bone? Myths and Facts.

# dgi\_fast, beautiful, successful

12

As a participant of the DENTSPLY Friadent workshop, you and your spouse are very welcome to enjoy our evening social program and dinner at Berne’s “Kornhauskeller” which offers an outstanding ambience for an excellent lecture: Meet Hubert Schwarz, a motivation trainer and extreme athlete. In his lecture “Go beyond the limits”, Schwarz will show you how to grow with challenge. In your private and professional life as well as in sports, there’s one thing that makes the difference: Your inner strength. “Power of Mind” helps you to manage all tasks with self-confidence and success.

But there’s even more to discover in Berne: Enjoy the flair of a city which belongs to the UNESCO World Heritage. Berne’s time-honored sandstone buildings, the historical towers, and its 11 unique fountains make the city one of the most marvellous witnesses of medieval urban building in Europe. The Berne Museum of Art hosts the world’s most comprehensive collection of Paul Klee’s paintings. Einstein developed his theory of relativity in Berne, and the chocolate producer Tobler invented “Toblerone”.

In a word, Berne offers something for everybody. And thanks to the UNESCO World Heritage Program, it is mentioned in one breath with Rome, the pyramids in Egypt, or the Taj Mahal.

**We are looking forward to welcome you in Berne!**
